PRESS RELEASE

Oslo, Norway, June 10, 2006

Tordivel AS, Norway, and MaxxVision GmbH, Germany, announce a cooperation in distribution and support of Scorpion Vision Software®.

This cooperation is in line with Tordivel's vision to be a global supplier of machine vision and image processing software, and MaxxVision strategy being a major supplier of machine vision components in Germany.

The Compact Sony SmartCam XCI-SX1

Both companies are Sony Image Sensing Solutions (ISS) preferred partner and the integration of Scorpion Vision Software® into the Sony XCI-SX1 Smart-Cam is expected to be a major success in Germany.

Scorpion Vision Software® is an open and independent machine vision system tool, offering "Twice the performance - Half the price". The system gives the production engineers the ease of use of a vision sensor and still the flexibility and power of a custom vision-pc system. The system is founded on top of a standard Windows 2000/XP PC platform benefiting from the ever increasing processing power of the Intel processors, low cost - high quality firewire cameras and the possibility and need to make multiple camera systems.

MaxxVision®
